***Reasons For Allowance***

None of the references disclose alone or in combination an electromagnetic modes of propagation supported by waveguide structure comprised of a thin metal film of finite width and thickness with dimensions such that optical radiation having a free space wavelength in the range from about 0.8  $\mu\text{m}$  to about 2  $\mu\text{m}$  couples to the strip and propagates along the length of the strip as a plasmon-polariton wave.
